AI PLANNING COMMITTEE

Overall Assignment

What is our purpose for this work?

What is the final product for our work?

What roles are represented and is anyone missing?

What is the scope and decision making authority for this team?

How will we review/revise our work based on rapid changes in AI?

How does this work align with school and district priorities?

What it Might Look Like

What is Generative AI and how might it impact teaching and learning in the coming years?

What is our vision of teachers, administrators and students (in time) using AI?

How does our vision leverage the power of AI and at the same time address GenAI risks including bias, "hallucinations", deep fakes, and misinformation?

How do we define AI literacy for each group and what scenarios might help communicate our vision of AI literacy in the district?

Getting it Done

How do we build capacity/teach/train teachers, administrators and students (in time)?

What software and/or hardware needs might align with our work on GenAI?

What kinds of budget allocations might be needed?

What policies and parameters will be needed for best practices and compliance?
