

AI IN EDUCATION

STUDENT AI LITERACY COURSE

Why AI Literacy Matters

AI is rapidly shaping the way we live, learn, and work. Students need not only the **skills to use AI tools effectively**, but also the **awareness to understand risks**, and the **habits to apply** them responsibly.

Developed by Dr. Elizabeth Radday, co-host of [ChatEDU](#), this course is designed for middle and high school students and delivers that balance, giving them **hands-on practice**, **guided reflection**, and **practical strategies** to thrive in an AI-powered future.

What Students Experience

- Guided videos + step-by-step activity instructions
- Safe, transparent interactions with a customized chatbot
- Structured reflection tasks that deepen learning

What Teachers Get

- Teacher Dashboard with visibility of all student chats
- Ability to provide direct feedback on student work
- Supplemental PDF with classroom extensions and a teacher guide

Built for Schools

- Flexible implementation models
- Pre/post surveys to track student growth
- Aligned with multiple AI Literacy frameworks
- Hosted on our FERPA/data privacy-compliant platform
