Helpful Robots!

Ifeoluwa Adesola

Highland Elementary

Health, Restaurants

What problems are you trying to solve?

I am trying to solve the problems of business not being open and Doctors and Nurses and everyone else who works in the Health Department having to risk getting sick by taking care of sick patients. 😞😞

What inspired you to address this problem?

I was inspired by knowing that people are risking their own lives to take care of another person and I was also inspired by knowing that we cannot go into any restaurants because of the Corona Virus. 😞

Describe your idea and functionality:

My Idea is to create robots that will help us dine in restaurants during these hard times.

COVID-19 Computing Challenge

Evelyn Joy Twinker

Jefferson Elementary School

Health

What problems are you trying to solve?

We are trying to solve the spread of the coronavirus through some ideas. My primary focus is to create the App for contact tracing to monitor and control COVID-19.

What inspired you to address this problem?

I have been following the data on the website about this pandemic. Hearing in the News that more innocent lives are affected by this virus. I would like to step up and provide my ideas to save the lives of loved ones

Describe your idea and functionality:

Ideas to create an app to monitor and control the COVID-19 spread.

How to Stay Healthy During COVID-19

Kylie Finkle

Totoket Valley Elementary School

Health

What problems are you trying to solve?

Avoid touching your face and stay at least 6 feet away from people. Don't go to the store as much as you would usually go and don't touch things at the store. You should wipe them down before you bring them in the house, you should mop and wipe everything down at the end of the day to kill all the germs, and if you also get take-out you should heat it up to kill all the germs, You should also wear masks going to the store.

What inspired you to address this problem?

There are still a lot of people going out so I thought maybe if I wrote this it would help stop a little more. But if you are going to go out, make sure to wear a mask and gloves just to be safe. Also because my mom never goes out, but when she does she only gets the stuff she really needs. We also use Instacart so that's a big help too.

Describe your idea and functionality:

How to stay healthy during covid 19 where's mask and gloves

Online School

Claire Federle

Sarah Noble Intermediate School

Education

What problems are you trying to solve?

I am trying to solve a problem about school being hard for kids online. School is different online for kids and I want to try to make it easier.

What inspired you to address this problem?

I was inspired by my mom who is a teacher and she tries to make it easier for the kids, but sometimes it is just hard for younger kids. I feel bad for the younger kids that are in school and do not really know what is happening and have so many questions why they are not going to school.

Describe your idea and functionality:

I have decided to make a link about different ways online school is a good thing. I will also have some things to help you like it more.

Caring for your neighbors

Hannah Meyer

Sarah Noble Intermediate School

Vulnerable Populations

What problems are you trying to solve?

Making sure that elderly people are cared for and feel connected to the community.

What inspired you to address this problem?

I want to address this problem because elderly people are at a high risk for catching COVID-19 and are often left alone because their family is busy with other things or live far away.

Describe your idea and functionality:

My idea is sort of like Facebook or another social media platform. If something like this is created then elderly people can register (or someone in their family can register them) and when they are in need of something they can post that they are in need, and other members of the community could "adopt" this person and help them get what they need. Since technology is sometimes confusing for elderly people it would be a very simple platform, where they just need to select what they need and then the person who "adopts" them can contact them and let them know they will bring what they need.

Germ Busters

Ava Lyons

Northeast Academy

Education

What problems are you trying to solve?

Teaching younger children to wash hands and practice good health care. Little kids may not understand the importance of doing this so to make it fun for them and turn it into a game will help them to do it as part of their routine.

What inspired you to address this problem?

Trying to make it fun for my little sister (age 3) to wash her hands since she doesnt like to stop and do it. She doesnt know that she could have germs on her that could hurt her or someone else.

Describe your idea and functionality:

Game app that has simple songs about germs that little kids can learn to sing along with while washing their hands. The game would also have characters that would be in different situations where they could stop germs - for every right decision they make they would get a tissue - at the end of the game they can watch the tissues chase all the germ monsters away. For example, the character would have little green germs on their hands and before dinner they would have the choice to start eating or washing hands. They would have to squeeze the soap and scrub to get all the germs away. If the character sneezes they would see the little green germs fly in the air - tapping the characters elbow would show the character sneezing and not having germs fly out.

Vid World

Gabriella Morin

Northeast Academy Arts and Magnet School

Just to see how others are dealing with this.

What problems are you trying to solve?

I am not mainly trying to solve a problem, But if you really think about it I am trying to see others people's ideas on how they handle it.

What inspired you to address this problem?

Knowing that we can't see friends but we can learn all around the world what people are going through and how it is effecting their own life. Also maybe some idea's people have to make this a little fun.

Describe your idea and functionality:

This will be an app where you can look around the world and people can post dances, personal speeches, or whatever describes their mood. The people all around the world can tell us about their experience with this crisis. Also they can tell other people in the world how they are dealing with this or what they are doing for fun. That's it. Thank you for listening.

PREVENT COVID-19 by HT App

Rishita Kulkarni

Glastonbury East Hartford Magnet School

Community, Vulnerable Populations

What problems are you trying to solve?

The problem here is that not a lot of people follow these rules such as staying six feet away (Social Distancing) from strangers or washing your hands to prevent spread of the disease. So with these rules getting broken, that is the start of COVID-19. So the idea here is develop an app to notify users when the rules are not followed. Also it will give information about disease.

What inspired you to address this problem?

I got the inspiration of this idea in my head when one day I was just wondering "Hmm, Everybody Keeps saying stay home, stay safe! What if there was a mobile app which will actually help stay safe when you are outside instead of getting COVID-19. Since nowadays most people have a smart phone, how about "I make an app!" So that is where it bought me here.

Describe your idea and functionality:

I'm proposing an idea to create an app to prevent COVID-19. Which has the following features:

- 1) Giving notifications by beeping on your smart phone if you come near a stranger within 6 feet radius using sensors,*
- 2) Remind people to wash their hands once they come home from outside*
- 3) Providing your journey map at the end of the day (Places you visited)*

These features mostly focus on defeat the spread of the disease.

- 4) Providing information about nearby COVID- 19 testing lab if you feel sick*
- 5) Sending information to others (family members/friends) if tested positive. These features mostly focus on aid local or global communities.*
- 6) If you are walking/ driving in a zone with COVID – 19 positive patients, then app will provide information about it.*

This feature focuses on encourage or inform others.

Tosent

Gabby Morin

Northeast Academy Arts And Magnet School

Community, Education, Entertainment, Health

What problems are you trying to solve?

I am trying to solve the problem of people's health in the crisis. I have also decided to provide Education And Entertainment during this hard time. The last thing I added was for everyone to know "We are all in this together,"

What inspired you to address this problem?

I got inspired to address this problem because, I think there are people out there struggling with this crisis. Also Because If you are a Teacher, you are trying to figure everything out. You want the best education for your students but this is all completely new too. Also I want to help own Community. I want to help this from spreading.

Describe your idea and functionality:

My App will have a daily -community challenge. For Example each day there will be a different task to try to complete. Something like make a card for a nurse, or if you know someone who is sick make a card or present so they know we are there for them. Also on the Education side, I want to give some website's that could be a good learning resource, for example there can be fun education while learning about animals. {Here is a link-}

(<https://youtu.be/eSuNTO73Ae8/>){And One more for an example-}

(<https://youtu.be/dNOFSVMA-MY>) This Website also provides Entertainment. "Have you seen the Skunk! " Last of all, We are going to talk about Community. Each Day make a nice reminder saying stuff. For example: "We are all in this together," Enjoy this app idea. Bye. :) Thank you for protecting us you are working so hard for our safety! Bye!

Summer Blast

Caitlin Leska

Highland Elementary School

Entertainment, Keeping kids busy over summer

What problems are you trying to solve?

Kids being bored is a big problem during COVID-19. Many kids find themselves not knowing what to do. This will help many kids not be bored.

What inspired you to address this problem?

Everyone is saying that they are so bored all day long with nothing exciting to do. I thought it would be a good idea to think of an app that will keep kids busy during the day. There are ideas for all sorts of games and crafts you can do with things around your house.

Describe your idea and functionality:

You go to the app and there is a search bar. You can look up any craft or activity in that search bar. If you don't know what you want to search you can just look up outside activities. If you have any suggestions you can click the box on the right hand corner that says suggestions.

Covid-9teen

Khadija Kadri

Jefferson Elementary School

Businesses, Community, Education, Health, Vulnerable Populations

What problems are you trying to solve?

The problem I am trying to solve to educate people about the virus, symptoms, how to prevent infection, how to be safe, what to do if you get an infection, how to stop spreading virus if someone infected, how to make a mask, importantly providing updates of world and U.S with the number of infections, deaths and recovered patients, update on available bed in U. S hospitals, U.S States testing efforts and travel guidelines information.

What inspired you to address this problem?

I wanted to build a website to inform and educate others about the COVID-19 in one place by providing necessary important information about the infection, symptoms, how to prevent it and giving necessary updates about world and US statistics.

Describe your idea and functionality:

My website has different pages. On the home page you can get a brief knowledge about Pandemic COVID-19. I have important resources available on the learn page so people can learn about coronavirus. On the symptoms page it talks about developed symptoms due to COVID-19. On the prevention page it shows you what precautions you need to take to prevent it. On the help page it shows you what to do if you get an infection. On the updates page it gives you different data and statistics about the infected people, deaths and people who have recovered from the disease. Also its shows you testing data for the states, hospital beds occupancy and travel guidelines.

Counter Covid.com

Ty Murphy

Sherman School

Health

What problems are you trying to solve?

Having the right personal protective equipment such as face masks and gloves .

What inspired you to address this problem?

My inspiration was people not having a mask to use and using other things such as bandannas which may not cover your face or slip in comparison to a regular face mask.

Describe your idea and functionality:

My idea is to have an app or website that sells masks and gloves and other personal hygiene products that are crucial to have in the current health crisis. The way it functions is you would go to the website and there would be 4 sizes of mask big, medium,small, and kid size and you could make a custom mask and it would fitted to your face and to do this you must scan your face and upload the dimensions. Another feature of the custom mask is you can chose the color and materials it's made out of . Along with a mask it would sell plastic gloves and hand sanitizer with multiple scents and custom scents and to top it off it has kits that you can make your own mask with selectable styles to chose from .

Just A Tap Away

Kashish Koul

Windermere Elementary School

Community

What problems are you trying to solve?

With the current pandemic situation, many elderly community members are not able buy their basic day-to-day groceries and supplies.

What inspired you to address this problem?

I was inspired by "distance learning" program, where school lessons are "delivered" by the teachers to the students at their houses. I thought of a way in which the elderly could be "delivered" their groceries and other supplies at their houses. I know that many people in my community would like to help these elderly people.

Describe your idea and functionality:

Many elderly are not comfortable with online shopping. If we device an app where an elderly person could submit their grocery list, and other "volunteer users" of the app, closest to their area could be notified, then the process of the "volunteer user" buying groceries for the elderly user and delivering to their house would be made simple.

Covid-19 Safety Website/ Store

Madison Williams

Jefferson Magnet School

Connection and safety

What problems are you trying to solve?

With my 2 websites, I am trying to solve the problem of the coronavirus spread and how we can defeat the spread by learning safety tips.

What inspired you to address this problem?

What inspired me is that my online friend's mom had the coronavirus but she survived due to health care but she still had no cure. I want people to understand that this is not a joke and we need to really stay safe cause there isn't no cure for the coronavirus but if you have serious health issues, there is a 100% chance that you will end up passing away

Describe your idea and functionality:

Website #1: COVID-19 SAFETY WEBSITE

My idea for this website is to inform people about how important safety is when coronavirus is around. I will like for people to understand that coronavirus is not a joke.

Website #2: COVID-19 SAFETY ONLINE STORE

This idea for this website is for the people who don't have the cash to get items they need to stay safe. My website is invented to help people who need the items but none of the stores have them right now. Each item on our website is \$1.00

All in this together.

Gabriella Morin

Northeast academy arts and magnet school.

Community, Health

What problems are you trying to solve?

I am trying to teach people how serious this virus is. All our loved ones are put at risk because of this virus. I will create this app to teach more about Covid-19.

What inspired you to address this problem?

I got inspired by just myself, knowing all these people getting sick. This virus is changing our world. People we love have a risk of getting sick. We need to be smart about this virus, and so this is why I am creating this app.

Describe your idea and functionality:

I would create a website that can unite us together. In this Crisis, we sometimes may feel lonely or we may feel sad that we can't do the things we do on a regular day. So I have decided to make a website that can contain others thoughts, worries, and feelings about this crisis. This website will teach our whole world how we are in this together. This app will also include many important health concerns while dealing with this crisis. When you go to the main page of this website it will give you the latest news on Covid-19.

Were you exposed?

Lena Riddle

Windermere School

Community, Health

What problems are you trying to solve?

I am trying to solve the problem of people not knowing someone they were in contact with has the virus and that they may have been exposed to COVID-19. My app will allow people to easily notify their family, friends and co-workers that they have the virus.

What inspired you to address this problem?

My inspiration is to help people. I want to give everyone the ability to understand where the virus is spreading including people without symptoms. I believe this is a very important missing link.

Describe your idea and functionality:

My app would be connected to your contacts and if you got tested and it came back positive you would go in and check off all of the people you can remember you were in contact with. Then the app would text all of the people you checked off and they would know they may have been exposed.

Seize your day

Lucas Anderson

Center Elementary School

Education, Socialization

What problems are you trying to solve?

Lack of communication between students and teachers, and socialization with children in these difficult times.

What inspired you to address this problem?

We have experienced as students and friends so we know how it feels to do at-home learning and miss our friends. We want to make it as little of a burden as possible for us and others.

Describe your idea and functionality:

This app is a within school and home communications app. Teachers and parents can choose who their students or children can talk to. Each child has a communications code that are the most important piece of information in this app. For the school version the principal can choose students that go to the school and the teachers can choose their students out of that bunch. The parents are most in control because they can choose who their children talk to and say yes or no to the child or teacher who want to get the communications code.

Covid-19 Defender

Adrien Grullon

South Street Elementary School

Community, Education, Health

What problems are you trying to solve?

The problem I'm trying to solve is the spread of the Coronavirus disease from spreading from community to community.

What inspired you to address this problem?

What inspired me was watching the news and seeing how people are now scared for their well-being. How people can't even go to a supermarket or a store without wearing a mask. You now have to look out the window to see your family or friends.

Describe your idea and functionality:

The idea I chose to do was a website. My website would be about how to live your daily lives with the Covid19. Since we can't prevent the coronavirus from existing, there are still ways you can prevent yourself from getting the coronavirus while still being safe. Now that summer is coming people are forgetting that we still need to be quarantining, as well as practicing social distancing. There are still ways you can enjoy the summer while still being able to follow rules and regulations.

Caramal

Brendan Ayers

Center Elementary School

Businesses, Community, Vulnerable Populations

What problems are you trying to solve?

Knowing what inventory is in a store. Knowing when inventory will be restocked. Knowing how many customers are currently in the store. This will reduce shopping time and expose time by making shopping more efficient.

What inspired you to address this problem?

Overcrowding and a lack of efficiency while shopping makes maintaining social distancing a difficult task. How to lessen the exposure time during shopping by making shopping more productive than it currently is.

Describe your idea and functionality:

The three problems that this app informs you on is what the store has, so if you need sunscreen you can just type that in the Store Inventory section and it will pop up with a store that has it, our app also informs you on how many people are in the store at the time so that can be tracked by GPS. Another thing is if the store you are at, and is out of the one thing you went there to buy, you can go to the 'Store Inventory' and type what you need and it will tell you if they have it and if not when they will refill stock of the item you need. The employees who bring the food in will update the app. This way you can prevent more exposure from going to a store even if they don't have what you need. And instead of going from store to store and more exposure you can find the right store right away.

COVID-19 Help Guide

Het Kathiriya

Jefferson Science Magnet School

Health

What problems are you trying to solve?

I believe there is a lack of awareness in some people regarding how to stay safe from COVID-19. This small website or a mobile app contains the safety guidelines which are meant to educate them so they can follow it and can stay safe.

What inspired you to address this problem?

I see there are people out and they are not following safety rules like not wearing mask and hand gloves etc when they are out so I thought this small website or app built with safety guidelines can help them. They can easily access it or download it via their mobile app store.

Describe your idea and functionality:

My idea is to encourage people to wear masks, gloves and follow the safety rules. My projects' functionality is that it shows what people could do to protect themselves, stay safe, how to make a homemade mask and much more can be added.
